## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-34, drawn to compositions comprising an ester quat.

Group II, claim(s) 1-34, drawn to compositions comprising a quaternary amide.

Group III, claim(s) 1-34, drawn to compositions comprising an alkoxyated quat.

Group IV, claim(s) 1-34, drawn to compositions comprising a nonionic fatty ester.

Group V, claim(s) 1-34, drawn to compositions comprising a fatty acid condensation product.

Group VI, claim(s) 1-34, drawn to compositions comprising an alkylmethyl quaternary ammonium compound.

Group VII, claim(s) 1-34, drawn to compositions comprising an amido alkoxyated quaternary ammonium compound.

Group VIII, claim(s) 1-34, drawn to compositions comprising a quaternized amido imidazoline.

Group IX, claim(s) 1-34, drawn to compositions comprising a polyamine salt.

Group X, claim(s) 1-34, drawn to compositions comprising a polyalkylene imine.

Group XI, claim(s) 1-34, drawn to compositions comprising an alkyl pyridinium salt.

2. The inventions listed as Groups I-XI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Any feature which unites the inventions fails to make a contribution over the prior art, as claim 1 is obvious over Smets et al., US 2002/0037824. The reference discloses compositions which may comprise an ester quat [0155]+, a polyolefin [0233] and a bleach [0089]+.

**3. Having chosen one of Groups I-XI, further restriction is required:**

Group A, claims 1-34, drawn to compositions comprising water dispersible polyolefin

Group B, claims 1-34, drawn to compositions comprising water soluble polyorganosiloxane.

Group C, claims 1-34, drawn to compositions comprising water dispersible polyorganosiloxanes.

**4. Having chosen one of Groups A-C, further restriction is required:**

Group a, drawn to compositions comprising PTFE particles.

Group b, drawn to compositions comprising PVA particles.

Group c, drawn to compositions comprising PVA/a particles.

5. Because the restriction requirement is relatively complex, no telephone restriction was attempted.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to the examiner, Dr. John R. Hardee, whose telephone number is (571) 272-1318. The examiner can normally be reached on Monday through Friday from 8:00 until 4:30.
